Sumaiya Akter Runa

Junior Flutter Developer | AI/ML, TensorFlow Lite & LLM-Powered Apps
Chattogram, Bangladesh | 01612969677 | runaakter3301@gmail.com
LinkedIn | GitHub | Behance | Portfolio

Professional Summary

Junior Flutter Developer and CSE graduate of IIUC (2026) who builds mobile apps end to end, from Flutter interfaces to Django, FastAPI, Flask and Supabase backends, with on-device and LLM-powered AI features. Delivered 10 Flutter projects, 5 of them AI-powered, including AquaGuard AI, a fish-health screening app for Bangladeshi farmers and the final project of the BDApps National Android Developer Bootcamp 2026 (Top 150 nationwide). Led an all-women Flutter team as She Squad Leader. Seeking a Junior Flutter Developer role to build reliable, user-focused apps that apply AI to real problems in agriculture, education and health.

Technical Skills

Languages & Frameworks: Dart, Python, Flutter, Django REST Framework, FastAPI, Flask
State Management: BLoC, GetX, Riverpod, Provider
Backend, API & Database: REST APIs, JWT Auth, Firebase, Supabase, PostgreSQL, MySQL, Firestore
AI & ML: TensorFlow, Keras, TFLite, CNN, EfficientNetB0, MobileNet, LLM APIs (Groq, Gemini), NLP (BERT, BiLSTM)
Tools: Git, GitHub, Docker, Android Studio, VS Code, Figma

Projects

AquaGuard AI – **Android App** | *Flutter, Provider, TFLite, Flask, Gemini* GitHub | LinkedIn 1 | LinkedIn 2

- **Impact:** Helps Bangladeshi fish farmers spot pond and fish problems earlier; screening and assistant fallback work offline.
- **AI Screening:** 7-class EfficientNetB0 (6 diseases + healthy) trained on public datasets (12,090 images): 97.9% test accuracy (756 of 772), run on-device with TFLite after a fish/not-fish check. Public data, not field trials.
- **Monitoring & Backend:** Dashboard for 9 water readings with risk level, health score and charts; Gemini Bangla assistant; Flask API on Render; PHP service with BDApps API for OTP and subscription.

StudyMate AI – **Android App** GitHub | LinkedIn
Flutter, Django, PostgreSQL + pgvector, Celery, Redis, Groq, Gemini, Docker

- **Core Feature:** Students upload a PDF and get summaries, key points with page tags, Q&A, and quizzes (5, 10 or 15 questions) with weak-topic tracking.
- **Grounded AI (RAG):** PDF text is split into chunks and stored as Gemini embeddings in pgvector; only the closest chunks are sent to the Groq (Llama) model, which cites the page numbers.
- **Backend:** Celery and Redis process PDFs in the background; JWT auth with tokens in Android secure storage; Dockerized Django API on Render.

ReplyPilot AI – **Android App** | *Flutter, Riverpod, FastAPI, PostgreSQL, Docker, Groq* GitHub | LinkedIn

- **AI Replies:** Drafts Bangla, Banglish and English replies from the seller's products and stock; seller reviews before sending.
- **Business Logic:** Orders with automatic stock updates, customer tracking, follow-up reminders and sales overview.
- **Security:** JWT and Argon2 auth, server-enforced monthly AI limits; prices and stock come from the database and mismatched numbers are flagged.

Postpartum Depression Support App (Top 25, BDApps Innovation Summit 2025) | *Flutter, Firebase, BLoC*

- **Frontend:** Built the Flutter frontend with BLoC and a calm, responsive UI for mothers dealing with postpartum depression.
- **Feature Design:** Planned mood check-ins, journaling and guided relaxation screens with soft colours and simple, accessible navigation.

Readora – EPUB Reading App | *Flutter, Supabase*

- **Reader:** EPUB reader with text size, dark mode, bookmarks, highlights, notes, in-book search, word meaning and translation.
- **Library:** 100 public-domain books, personal Library, offline download, reading streak and book reviews.
- **Backend:** Supabase backend with user login; premium lock on selected content (payment is a demo flow for now).

Calmi – UI/UX Design (Team Project) | *Figma* Behance | LinkedIn

- Designed 90+ screens for a mental wellness app: onboarding, meditation, mood tracking, sleep tracking and AI chat.

Other Projects: Leaf Disease Detection and Cat & Dog Classifier (TFLite) | IIUC Blood Bank App (GetX, Firebase)

Experience

She Squad Leader, *BDApps She Squad Program* *Jun 2026 – Oct 2026*

- Led an all-women Flutter team building revenue-generating apps; coordinated tasks and architecture decisions.

Flutter Developer, *BDApps National Android Developer Bootcamp (Top 150 nationwide)* *May 2026 – Aug 2026*

- Built AquaGuard AI under senior engineer mentorship and integrated the BDApps subscription system.

Junior Flutter Developer, *Brain Machine AI, Chattogram* *Jan 2025 – Apr 2025*

- Built and delivered Flutter app features on schedule in an agile team.

Education

International Islamic University Chittagong (IIUC), *B.Sc. in Computer Science & Engineering* *2022 – 2026*

Certifications & Achievements

- Research paper accepted at ICCIT 2025: CrossStack-BERT (BERT–BiLSTM–CNN) for Bangla medical specialist classification.
- Ostad: Flutter Developer with AI Course | BDApps App Publishing & Revenue Training | NASA Space Apps 2024, 2025.
- Top 150, National Android Developer Bootcamp 2026 | Top 25, BDApps Innovation Summit 2025 | IEEE CUET 3MT Top 40.
